# Math Maze: Finding the Sum

Go through the maze to connect the sum to the problem. Use a different color for each problem.

The maze is a square with a thick black border. Inside, a network of black lines forms a complex path. At the top edge, there are three numbers: 9, 12, and 10. At the bottom edge, there are three math problems: 11,  $4+5$ , and  $9+3$ . On the left edge, there are three math problems:  $4+5$ ,  $7+3$ , and 8. On the right edge, there are three numbers: 8,  $+3$ , and 2, followed by  $+6$  and 9. The goal is to trace a path from a problem to a sum.
