

Name: _____

Roller Coaster Rounding: Rounding to the Nearest 10

When we round numbers, we change the number to what is closest. It's something like a roller coaster. If the number is a car on the roller coaster, then it either moves forward or backwards depending on where it is.

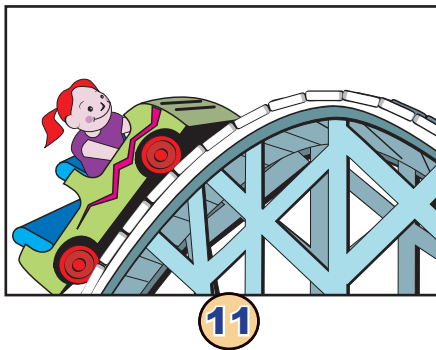

If the roller coaster car ends between 0 and 4, it goes back to the beginning.

If the roller coaster car ends between 6 and 9, it goes forward to the end.

If the roller coaster car ends in 5, it goes forward to the end.

Let's see if you can find where the car goes on each roller coaster car below. Round the following numbers to the nearest 10. Write the answer in the blank.
